

BVA[®]
HYDRAULICS

INDUSTRIAL HYDRAULIC EQUIPMENT

BVA-EN 25Q1

The BVA Advantage

BVA Industrial Hydraulics was launched in 2005 and is centrally located in Europe in Etten-Leur, The Netherlands. BVA is one of the Shinn Fu Europe brands besides Omega Lift, Omega Mechanix and Prolift. Shinn Fu was founded in Taiwan in 1971 and began doing business in Europe in 1994. Shinn Fu has over 2,000 Employees worldwide with its headquarters in Taipei, Taiwan.

Confidence Built on Quality

ISO 9001

BVA products are manufactured through an International Quality Assurance System, ISO 9001 which involves consistent observation of administration, management, manufacturing, and production control. Under this system, the related operations are monitored on all aspects from purchase order to assembly line and to shipping the order.

BVA Products comply with the following industry standards

ASME B30.1

The cylinders comply with load testing requirements and / or the safety factor for material yield strength while still functioning properly without oil leakage.

ANSI B40.1

BVA pressure gauges meet the criteria for grade A.

SAE 100

BVA hydraulic hoses comply with the Material Handling Institute's specification of minimum life cycles and minimum burst pressure rating.

BVA Limited Lifetime Warranty

BVA products are warranted to be free of defects in materials and workmanship. Any BVA product that does not conform to specification will be repaired or credited (at BVA's option) at BVA's expense for the life of the product. Contact BVA for disposition of this warranty.

This warranty does not cover normal wear and tear, abuse, misuse, alteration or use of improper fluids or improper maintenance as determined by BVA and its authorized service centers. All electric motors, gas engines, batteries and other parts or materials sold with or part of BVA products but are separately warranted by another manufacturer, are covered by that manufacturer's warranty and not the BVA Lifetime Warranty. BVA shall not be liable for consequential or incidental damage or loss.

Repair Parts
We offer a large range of product replacement parts, please contact your local BVA dealer for more details.

Contact
For technical support, or for questions about your product, contact your local BVA dealer.

Single Acting Cylinders

H Series - General Purpose, Spring Return

Capacity:

5 - 95 Tons

Stroke:

25 - 362 mm

Max. Operating Pressure:

700 BAR

Min. - Max. Height:

92 - 838 mm

*** Larger Tonnages**
For tonnages that exceed 100, please refer to our HG Section
pg 24

Single Acting Cylinder H1506 in the collapsed position with CB15 cylinder base for safety.

Single Acting Cylinder H5513 in the collapsed position ready to lift a load.

- Collar threads and base mounting holes for fixturing
- Hard chrome plated piston plunger protects against corrosion and damage
- Polyurethane U-Cup seals provide a sure seal and long life
- Solid one piece alloy steel body
- One piece aluminum alloy bearing protects against cylinder wall damage
- CH38F high flow coupler with dust cap is standard on all cylinders

Safety Practices
Good industry practice recommends not exceeding 80% of maximum rated capacities of all our products.
pg 80

HU Series – Aluminum Cylinders
Aluminum cylinders make a great lightweight alternative being up to 60% lighter than comparable steel models.
pg 38

See pages 8-9 for detailed specifications.
* Cylinder is equipped with carrying handle.

H Series

Cylinder Accessories
See the assortment of accessories designed to work with our products.
pg 48

Combo Kits
Most cylinders are available in easy to order kits: Cylinder, Gauge, Couplers, Hose and Pump.
pg 68

Related Product: Gauges
Reduce the risk of overloading your product by using a gauge. A variety of graduations and types to suit any need.
pg 85

Safety Instructions
Visit our DO'S and DON'TS section to review the best methods of operation. Always be prepared.
pg 114

High-Flow Couplers
High-Flow Coupler: CH38F is included on all models (except where specified).

Optional Tilt-Saddles
Saddles tilt to a 5% maximum to adjust to the load. Match up these saddles with the following cylinders:

- SDT05 → H05 Cylinders
- SDT10 → H10 Cylinders
- SDT15 → H15 Cylinders
- SDT25 → H25 Cylinders
- SDT55 → H55, H75, H100 Cylinders

Double Acting Cylinders

HD Series - General Purpose

Capacity:

10 - 140 Tonnes

Stroke:

155 - 461 mm

Pressure:

700 BAR

Min. - Max. Height:

331 - 1269 mm

HD10006

HD3008

- Plunger wiper seals out dirt and contamination
- High strength steel construction from gun drilled solid bar
- High flow 3/8" NPTF female couplers
- One piece high grade alloy bearing for side load protection and long life
- Ideal for pushing and pulling
- Maximum working pressure: 10,000 psi / 700 bar
- Threaded cylinders, removable saddle, thicker cylinder walls
- Retract under hydraulic power for faster operation

80% **Safety Practices**

Good industry practice recommends not exceeding 80% of maximum rated capacities of all our products.

HD cylinders can be used in pushing and pulling applications. In this photo, we see a HD cylinder set up for a push application using a special designed mobile cylinder base plate.

HD5513

HD Series

HDU Series – Aluminum Cylinders

Aluminum cylinders make a great lightweight alternative being up to 60% lighter than comparable steel models.

40 pg

Cylinder Accessories

See the assortment of accessories designed to work with our products.

48 pg

Combo Kits

Most cylinders are available in easy to order kits: Cylinder, Gauge, Couplers, Hose and Pump.

68 pg

Related Product: Gauges

Reduce the risk of overloading your product by using a gauge. A variety of graduations and types to suit any need.

85 pg

Safety Instructions

Visit our DO'S and DON'TS section to review the best methods of operation. Always be prepared.

114 pg

High-Flow Couplers

High-Flow Coupler: CH38F is included on all models (except where specified).

Relief Valve

All double acting cylinders are equipped with a pressure relief valve located next to the retract port. These pressure relief valves help prevent cylinder over pressurization on the return port side of the cylinder.

Low Profile Cylinders

HL Series - Low Clearance Lifting

- Compact design for use in confined spaces.
- Plunger wiper helps seal out dirt and contamination.
- Specially designed return spring provides quick retraction and extends the life of the spring.
- Hard chrome plated plunger helps prevent scratching and corrosion.
- Plunger end is grooved to reduce load slippage.
- Includes high flow coupler and dust cap.
- HL1001, HL2002, and HL3002 coupler is tilted 5° for added clearance.

HL Series

Low profile cylinders are great for confined spaces.

Low Profile Cylinders Combo Kit

Low Clearance Lifting

▲ Press truck wheel from nave with the mini-press. Fits between the chassis and wheel.

- Compact design for use in confined spaces.
- Ideal for pushing applications.
- Plunger wiper helps seal out dirt and contamination.
- Return spring ensures a quick retraction and extends the life of the spring.
- Industrial hard chrome plated plunger helps prevent scratching and corrosion.
- Includes stackable 1", 2", and 3" aluminum adapters that conveniently snap into the base of the plunger.
- Includes high flow CH38F coupler and dust cap.
- Convenient storage case.

HL Series

Safety Practices
 Good industry practice recommends not exceeding 80% of maximum rated capacities of all our products.

Related Product: Hoses
 We offer a variety of hoses, fittings, lengths and materials.

High-Flow Couplers
 High-Flow Coupler: CH38F is included on all models (except where specified).

HLN Series

Safety Colour Band

BVA Lock nut cylinders are equipped with a yellow safety band. Do not extend the ram beyond this point as it may result in a loss of hydraulic oil and damage to the cylinder and/or load.

80% Safety Practices
Good industry practice recommends not exceeding 80% of maximum rated capacities of all our products.

- Single acting cylinder with mechanical safety lock nut.
- Designed to support loads without hydraulic pressure.
- Overflow port prevents cylinders from over travel.
- Load return.
- Solid steel cylinder body.
- Electroless nickel plated plunger to resist corrosion and rust.
- Maximum working pressure: 10.000 psi / 700 bar.

Optional Tilt Saddles

Low Profile Lock Nut Cylinders

HLNF Series - Low Clearance Lifting with Mechanical Lock Nut

- Single acting cylinder with mechanical safety lock nut.
- Designed to support loads without hydraulic pressure.
- Low profile for confined spaces.
- 5° tilting saddle is standard.
- Maximum working pressure: 10,000 psi/700 bar.
- Equipped with CH38F high flow coupler.
- Load Return.
- Able to withstand 10% Side load @ 80% stroke

Related Product: Gauges

Flow Control Valves
Control the speed of your cylinder by adding a flow control valve.
pg 82

Related Product: Hoses
We offer a variety of hoses, fittings, lengths and materials.
pg 87

Gas/Diesel Engine Pumps
These HDG cylinders pair up well with a Gas or Diesel Engine pump. We offer a variety of different flow rates, motor sizes and reservoir sizes on our gas/diesel engine pumps. Contact your local BVA dealer for more details.

- Gas engine pump will provide 700 BAR hydraulic force at remote locations.
- Industrial grade 5.5 hp. (4.1 kN) Honda gas engine or 4.6 hp. (3.5 kN) HATZ diesel engine.
- Ideal for applications where electricity isn't easily accessible.
- Two speed pump designed for rapid cylinder advance.
- Gas pump features a sturdy protective roll cage for use in the toughest environments.
- Optional electric start with Diesel Engine.

Electric Motor Pumps
These HG cylinders pair up well with Electric Motor pumps. We offer a variety of different flow rates and motor sizes. Contact your local BVA dealer for more details.

- Meets OSHA regulations for sound (80dBA).
- Two speed pump designed for rapid cylinder advance.
- Internal filter screens contamination to prevent pump damage.
- All units are wired as 230 VAC 50 Hz; Optional wiring 120 VAC 50Hz.
- 100% Duty Cycle TEFC motors.
- All hand pendants are wired at 24VAC for safety.
- Full load starting capability.

High Tonnage Double Acting Cylinders

HDG Series - Heavy Lifting

Capacity:

95 - 1000 Tonnes

Stroke:

50 - 300 mm

Max. Operating Pressure:

700 BAR

Min. - Max. Height:

182 - 1114 mm
Side load 10% @ max stroke

HDG Series

Safety Practices
Good industry practice recommends not exceeding 80% of maximum rated capacities of all our products.

Optional Tilt-Saddles
Saddles tilt to a 5% maximum to adjust to the load. View our cylinder accessories page to figure out what saddle best fits these cylinders.

Related Product: Gauges
Reduce the risk of overloading your product by using a gauge. A variety of graduations and types to suit any need.

High-Flow Couplers
High-Flow Coupler: CH38F is included on all models (except where specified).

Relief Valve
All double acting cylinders are equipped with a pressure relief valve located next to the retract port. These pressure relief valves help prevent cylinder over pressurization on the return port side of the cylinder.

See next pages (pg.30-31) to view more detailed stats on High Tonnage Double Acting Cylinders.

Flow Control Valves

Control the speed of your cylinder by adding a flow control valve.

pg 82

Related Product: Hoses

We offer a variety of hoses, fittings, lengths and materials.

pg 87

Safety Instructions

Visit our DO'S and DON'TS section to review the best methods of operation. Always be prepared.

pg 114

- Cylinders are burnish rolled creating a smoother finish than honing
- Industrial hard chrome plated plunger prevents scratching and corrosion
- Base mounting holes standard on all models
- Plunger wiper seals out dirt and contamination
- High strength steel construction from gun drilled solid bar
- High flow 3/8" NPTF couplers
- Maximum working pressure: 10,000 psi / 700 bar
- Custom sizes are available upon request

Gas/Diesel Engine Pumps

These HDG cylinders pair up well with a Gas or Diesel Engine pump. We offer a variety of different flow rates, motor sizes and reservoir sizes on our gas/diesel engine pumps. Contact your local BVA dealer for more details.

- Gas engine pump will provide 700 BAR hydraulic force at remote locations.
- Industrial grade 5.5 hp. (4.1 kN) Honda gas engine or 4.6 hp. (3.5 kN) HATZ diesel engine.
- Ideal for applications where electricity isn't easily accessible.
- Two speed pump designed for rapid cylinder advance.
- Gas pump features a sturdy protective roll cage for use in the toughest environments.
- Optional electric start with Diesel Engine.

Electric Motor Pumps

These HDG cylinders pair up well with Electric Motor pumps. We offer a variety of different flow rates and motor sizes on our electric motor pumps. Contact your local BVA dealer for more details.

- Meets OSHA regulations for sound (80dBA).
- Two speed pump designed for rapid cylinder advance.
- Internal filter screens contamination to prevent pump damage.
- All units are wired as 240 VAC 50 Hz; Optional wiring: 115VAC 50Hz.
- 100% Duty Cycle TEFC motors.
- All hand pendants are wired at 24VAC for safety.
- Full load starting capability.

Hollow Plunger Cylinders

HC Series

Capacity:

13-100 Tonnes

Stroke:

8 - 155 mm

Max. Operating Pressure:

700 BAR

Min. - Max. Height:

60 - 486 mm

Here is a HC6006T in a pulling application.

- Ideal for pulling and pushing applications.
- Heavy duty compression spring.
- Dual wipers help prevent contamination.
- Collar thread protector.
- High flow coupler with dust cap.
- XT cylinders do not have internal plunger threads.
- 60 and 100 Tonne models are equipped with carrying handles.

Double Acting Hollow Plunger Cylinders

HDC Series

Capacity:
30 - 150 Tonnes

Stroke:
38 - 257 mm

Max. Operating Pressure:
700 BAR

Min. - Max. Height:
165 - 718 mm

- Ideal for pushing and pulling applications.
- Dual wipers help prevent contamination.
- CH38F - 3/8" high flow female coupler.
- Hard chrome coated plunger prevents rust and corrosion.
- Hardened steel seat.

HDC Series

80% Safety Practices
Good industry practice recommends not exceeding 80% of maximum rated capacities of all our products.

Relief Valve
All double acting cylinders are equipped with a pressure relief valve located next to the retract port. These pressure relief valves help prevent cylinder over pressurization on the return port side of the cylinder.

High-Flow Couplers
High-Flow Coupler: CH38F is included on all models (except where specified).

- Lightweight aluminum alloy construction.
- Up to 60% lighter than comparable tonnage steel cylinders.
- Convenient carry handle on 50 and 95 Tonne models.
- Hard anodized aluminum plunger provides extra protection against corrosion and wear.
- Integral steel protective plate.
- Maximum working pressure: 10,000 psi / 700 bar.

Aluminum vs. Steel Cylinders

Aluminum cylinders provide a great alternative to the traditional steel cylinder in many applications. Being up to 60% lighter in weight, Aluminum cylinders are easier portable and reduce user fatigue and strain. However, due to the finite properties of Aluminum vs. Steel, these cylinders should NOT be used in high cycle applications. The BVA Aluminum cylinders are designed for a maximum safety rating of 5,000 cycles. Under normal lifting applications this should provide a long service life.

Aluminum Cylinders

- 60% lighter in weight than steel.
- Easier portable and reduces user fatigue.
- Not to be used for high cycle applications.
- Base of the cylinder contains a steel plate*.

Steel Cylinders

- Much heavier than aluminum cylinders.
- Low portability on heavier cylinders which creates user fatigue and strain.
- Will out-perform aluminum cylinders in higher cycle applications.

*The base of the cylinders contain a steel plate with mounting holes that are designed to protect the cylinder from damage and should NOT be used in fixturing applications and ONLY be used to attach larger base mounting plates for lifting stability. They are NOT designed to withstand the full ratings of the cylinders.

Safety Practices
Good industry practice recommends not exceeding 80% of maximum rated capacities of all our products.

High-Flow Couplers
High-Flow Coupler: CH38F is included on all models (except where specified).

Lock Nut Aluminum Cylinders

HULN Series - Heavy Lifting w/ Mechanical Lock Nut

- Single acting cylinder with mechanical safety lock nut
- Designed to support loads without hydraulic pressure
- Overflow port prevents cylinders from over travel
- Spring return
- Lightweight aluminum cylinder body
- Steel saddle
- Hard anodized rod to resist corrosion and rust
- Maximum working pressure: 10,000 psi / 700 bar

80% **Safety Practices**

Single Acting Hollow Hole Aluminum Cylinders

HUC Series - Lightweight, Spring Return

- Light weight for easy handling.
- Ideal for pulling and pushing applications.
- Heavy duty compression spring.
- Dual wipers help prevent contamination.
- Collar thread protector.
- High flow coupler with dust cap.
- Equipped with carrying handles.

80% **Safety Practices**
 Good industry practice recommends not exceeding 80% of maximum rated capacities of all our products.

Related Product: Gauges
 Reduce the risk of overloading your product by using a gauge. A variety of graduations and types to suit any need. pg 85

Double Acting Aluminum Hollow Hole Cylinders

HUDC Series - Lightweight

- Lightweight for easy handling.
- Ideal for pushing and pulling applications.
- Dual wipers help prevent contamination.
- CH38F - 3/8" high flow female coupler.
- Hard chrome coated plunger prevents rust and corrosion.
- Hardened steel seat.

Safety Instructions
 Visit our DO'S and DON'TS section to review the best methods of operation. Always be prepared. 114 pg

Relief Valve
 All double acting cylinders are equipped with a pressure relief valve located next to the retract port. These pressure relief valves help prevent cylinder over pressurization on the return port side of the cylinder.

Threaded Cylinders

HT Series

- Ideal for frame pulling machines.
- Threaded plunger and base.
- Single acting cylinders with spring return.
- Removable threaded Plunger adapter for attaching accessories to plunger end and base.
- Maximum working pressure: 10,000 psi / 700 bar.

HT Series

80% Safety Practices
 Good industry practice recommends not exceeding 80% of maximum rated capacities of all our products.

Combo Kits
 Most cylinders are available in easy to order kits: cylinder, gauge, couplers, hose and pump. 68 pg

Pull Cylinders

HP Series - High-Tonnage Pulling

- High strength steel construction
- One piece high grade alloy bearing for side load protection and longer life
- Polyurethane cup seal provides optimum performance
- External plunger threads and Internal base threads
- Used for pulling and tensioning
- Maximum working pressure: 10,000 psi / 700 bar
- Spring extend return

Precision Double Acting Cylinders

HPD Series - High-Cycle Fixtured Application

HPD Series

*Note: Precision double acting cylinders do not come with couplers.

- Provides hydraulic power for both extend and retract
- Designed for high cycle production applications
- High strength steel construction from gun drilled solid bar
- Plunger wiper seals keep dirt and contamination out
- Clevis eye attachments are available
- Maximum working pressure: 10,000 psi / 700 bar

Related Product: Hoses

We offer a variety of hoses, fittings, lengths and materials.

Product Information

- Metal reservoirs resist cracking
- US Patent No. 5,946,912, a built in bypass device protects the hydraulic system from over pumping damage
- A compact yet powerful Air Turbo Motor US Patent No. 5,341,723
- Suggested air inlet range: 110-175 psi / 7.6-12.1 bar
- Maximum working pressure: 10,000 psi / 700 Bar

PA1500A Pressure Adjustment

PA1500A Pressure can be adjusted externally from 1,000 psi / 70 Bar to 10,000 psi / 700 Bar.

Universal Motor Pumps

PU Series - Light-Weight Pumps

PU20M4N01C

- Portable, light weight and compact design.
- Universal Motor, starts under full load and is available in either 120VAC 50/60 HZ or 240VAC 50/60HZ.
- 3mt 24 VAC pendant control for safety.
- Weighs only 18,3 kg. with oil.
- External pressure adjustment is available.
- Designed for intermittent duty operation.
- Gauge port on control valve.
- Reservoir Capacity 7.6L

Hydraulic Gear Pullers

5, 10, 15, 25 & 50 Tonne Hydraulic Gear Pullers have a safety cage design to help keep the jaws tight to the gear and prevent slippage that can cause injury. Pair these with BVA's PU20M3N01B Lightweight e-pump for portability. pg 96

Flange Spreaders

BVA's Pin Type Flange Spreaders are available in both 5 & 10 Tonne models and well suited for most environments. For portability and speed the PU20M4N01B would be an ideal choice. pg 104

Hydraulic Nut Splitters

Available in 3 models, each nut splitter can split a wide range of nut sizes thereby reducing the number of splitters needed. The BVA PU20DMP01B dump style pump functions well with these splitters. pg 95

Electric Pumps

PE30, PE40, PE50 and PE60 Series - Single Phase

- Meets OSHA regulations for sound (80dBA).
- 2 Stage pumps provide fast run up before the high pressure stage.
- Suction strainers screen out contamination to prevent pump damage.
- All units are wired as 240 VAC 50 Hz , and are IP54 rated.
- All hand pendants are wired 24 VAC for safety , and are IP65 rated.
- Starts under full load.

PE Series

Ordering Example

PE30M4N01D

After reviewing this model number, we know that the pump has the following specifications:

- Electric power source
- ½ Hp (0.37 kW) flow group
- Manual Valve 4W/3P
- 1 gallon/3.8 L reservoir tank

PE30M4U01D

3-Phase Electric Pumps

380V Electric power

- For both single acting cylinders and double acting cylinders.
- All hand pendants are wired with 24 VAC.
- Quiet operation meets OSHA regulations (80dBA).
- 2 speed operation allows for faster cylinder advance.
- Full load starting capacities.
- Internal suction strainer keeps contamination from damaging pump.
- Rugged durable design meets the demands of industrial applications.
- Precision components to minimize wear and improve overall dependability.
- Reservoirs equipped with sight level gauges.
- PE60 Models are standard as 380 VAC 50 Hz.
- Reservoirs size available in 22.7L and 60L, 60L reservoir is equipped with castors.

Gas Pumps

- Gas engine pumps will provide 10,000 psi at remote locations
- Industrial grade 5.5 Honda Gas Engine
- Ideal for applications at remote locations
- Two speed pump designed for rapid cylinder advance
- Gas pump features a sturdy protective roll cage for use in the toughest environments
- Manual control valve for use with single or double acting cylinders or tools

Diesel Pumps

- Diesel engine pumps will provide 10,000 psi at remote locations
- Industrial grade 4.6 hp / 3.5 kN HATZ Diesel engine
- Control valve for use with single or double acting cylinders or tools
- Two speed pump designed for rapid cylinder advance
- Pump features a sturdy protective roll cage for use in the toughest environments
- Ideal for application when diesel fuel in remote environments is required
- Optional: electric start

** Pump weights include oil.

Combinations

Pump and Cylinder Sets

Each set includes:

- 1/4" ID 2 meter Hydraulic Hose.
- 3/8" High Flow Male Coupler.
- 63 mm Diameter Wet Gauge.

We see here our combo kit SA15-3002L getting set up to lift a load. This combo kit includes a HL3002 cylinder, PA1500 air pump, CS3814 hose, CH38M coupler set, CF3814 gauge adapter and a GBW1460 pressure gauge.

Torque Wrench Pump

Each set includes:

- Torque 1 or up to 4 separate wrenches simultaneously.
- With integrated manometer.
- Pendant operated.
- Without rollcage is possible.
- Optional heat exchanger / system filter.

PU55T4W025C

Torque Wrench Air Pump

- Lightweight portable design, provides more users friendly.
- Constructed of high strength steel material for long life working.
- Air Driven, rotary motor, provides higher working efficiency on specific jobsite.
- Two speed operation which reduces user fatigue.
- Internal pressure relief valve for overload protection.
- Heavy duty vent screw mechanism, provides longer working life.
- 1/4"-18NPTF Oil Port, for 1 tool, or option 4 tools.
- Maximum working pressure: 10,000 psi/ 700 bar.

Low Profile Hydraulic Torque Wrench

- Standard head sizes from 3/4 to 7 1/4 and from 19mm to 185mm.
- The cylinder is made of TL-T6 lightweight aircraft alloy. Durable, but not heavy.
- Reduces overall dimensions of hex head including a thinner nose radius.
- Standard with 360° swivel couplers, even under pressure.
- Every tool is tested and calibrated to +/- 0.03 accuracy and +/- 0.01 repeatability traceable to N.I.S.T. standards.
- The LPTW tools allows the swivels to be manually relocated from the top of the tool to the back of the tool using only hand tools.

Torque Wrench Hoses

BVA Torque Wrench hoses are equipped with couplers.

C2S1414-4MF Twin Hose 4 meter
C2S1414-6MF Twin Hose 6 meter
C2S1414-10MF Twin Hose 10 meter

Square Drive Hydraulic Torque Wrench

- All SDTW series models of 15.000Nm or lower are armed with a 360° reversible reaction arm
- Sizes from 3/4" to 2 1/2" work with all standard-size impact sockets.
- Every tool is tested and calibrated
- Connection swivels 360°, even under pressure.

Battery Powered Torque Wrench

- Wireless connection with mobile or computer
- Predefinition and documentation of tightening process via wireless possible
- Torque and angle controlled tightening process possible
- Torque range from 20 to 8,000 Nm
- Slim design and low weight
- Large LCD color display, multilingual with control and warning messages
- Brushless motor with electronic torque shut-off
- Automatic release angle adjustable
- Safe working due to the free wheel between drive & gearbox which ensures no twisting of the torque wrench.
- With two high performance batteries 18V, 5.2Ah

- Optional**
- Offset Gearbox
 - Special reaction arms
 - Impact sockets in metric or imperial size

Matching impact socket can be found on the next page

Impact sockets

- All our Impact Sockets are manufactured with UNI-ISO 1174 & DIN 3121 standards.
- Manufactured with only high alloy steel.
- Special sockets on request available.
- Delivered with pin and o-ring.

Hydraulic Nut Splitter Case

Compact and Heavy Duty

- Spacers include a straight chisel with a 60/40 angle, and works on all type of materials, including stainless steel
- Chisel can be sharpened multiple times
- The aluminum flight case also includes one spare blade

1500 Bar Bolt Tensioner

- Fiveload cells from M16 to M105 or from 5/8"-11UN to 3 1/4"-8UN
- Twin ports for quick connection of multiple tools
- Only one size of bridge per size of load cell
- Detachable and rotational bridge simplifies tool positioning
- Full bridge window - increased access to socket
- Piston stroke indicator
- Black surface treatment protects against corrosion
- Universal and multi-use tool
- TB-Series Tensioners comply to Machine Directive 2006/42/CE

CVR3

CVL3

CVLS3

Flow Control Valves

700 BAR Rated

CVN1 and CVN3

CVC3

CVP3

Valve Type	Model Number	Ports	Applications	Hydraulic Symbol
Pressure Relief Valve	CVR3	3/8"-18NPTF	Controls pressure developed by the pump in hydraulic loop. By-pass occurs when preset pressure reaches 0-10,000 PSI. Turn clockwise to increase pressure, counter-clockwise to decrease.	
	CVR3/H	3/8"-18NPTF	Same as CVR3, but return line hose / 1 meter length is included.	
Manual Operated Check Valve	CVL3	3/8"-18NPTF	Mounted in line with a cylinder and will hold pressure in the cylinder in the event of pressure loss in the system. Pressure is manually released.	
	CVLS3	3/8"-18NPTF	This model is equipped with high-pressure bypass. Pressure is manually released.	

Valve Type	Model Number	Ports	Applications	Hydraulic Symbol
Needle Valve	CVN1	1/4"-18NPTF	Controls cylinder speed and acts as temporary shut-off valve for load holding.	
	CVN3	3/8"-18NPTF		
Check Valve	CVC3	3/8"-18NPTF	Allows flow in one direction only.	
Pilot Operated Check Valve	CVP3 + CVBL3	3/8"-18NPTF	Mounted in line with a cylinder which will hold pressure in the event of pressure loss in the system. Most often used on double-acting cylinders with pilot port, receiving pressure from a tee off of the cylinder retracting line. Pilot pressure ratio 15% or 6.5:1

Hydraulic Pressure Gauge

GDL14100 Manometer with Data Logging Function
The GDL14100T Manometer is a versatile instrument equipped with a data logging feature. It accurately records pressure and temperature measurements over extended periods, making it ideal for various applications. The device includes a USB drive and a separate connection cable, allowing for easy data transfer and analysis on your computer. Additionally, the GDL14100T offers customizable settings, enabling you to tailor its operation to your specific requirements, including the ability to select from a wide range of pressure units such as BAR, PSI, MPa, kN, Tonnage, and many more.

Valve Mount Pressure Adjustment

Sandwich Mounted

Model Number	Pressure Adj. Range (BAR)	Interval (BAR)	Suitable Model
PW-AS3	70 ~ 700	3,5	PU20 Series Pump

PW-AS1

- Pressure can be adjusted externally (70-700 bar)
- Works with single and double acting cylinders

Pressure Switch

CVS1

- Automatically shuts off electric pump when predetermined system pressure is reached

Model Number	Adjustable Pressure Range	Electrical Rating	Port Size	Weight (kg)
CVS1	69~700.35 BAR	15 amp @ 250V max	1/4"-18NPTF	0.6

CVS1

Foot Pedals

Single or Double

- Hands free pump operation
- Can be used with all pumps equipped with solenoid valves

FP1 for standard electric pumps on/off
FP2 for solenoid pumps push/pull

Foot controls with 3 meter cord.
(This option replaces the hand controls on solenoid equipped models.)

FP1

FP2

Solenoid Valves

Pump Mounted

- Pump mounted solenoid kits convert your manual pump to an electrically controlled pump.

Use With Cylinder	Model Number	Valve Type	Valve Function	Hydraulic Symbol	Schematic Flow path	Weight (kg)
Single Acting	PWS3	Solenoid 196 VDC	Advance/ Hold/ Return			3.4
Double Acting	PWS4	Solenoid 196 VDC	Advance/ Hold/ Return			3.9

Pressure Control Valve

PPC-1/PPC-2

- Modular valve with one or two cartridges.
- Excellent pressure adjustment over the entire operating range.
- PPC-1 and PPC-2 are only compatible with Solenoid Valves
- The extended mounting screws are not included

Valve	Model Number	Hydraulic Symbol
Pressure Control Valve	PPC-1	
	PPC-2	
Flow Control Valve	PFC1	
	PFC2	

Flow Control Valve

PFC

- Throttle check valves
- Adjustable to specific flow rate

Pump Mounted Manifold Block

CUMR2

- Converts BVA pumps with mounted valves for use with remote mounted valves
- 4 mounting bolts

Remote Mounted Directional Control Valves

Not to be used with Hand Pumps

Hydraulic Manual Press

With easy system for the lifting of the work table

- The contra weight allows an effortless and fast positioning of the work table (↑↓).
- Designed and developed to relieve the operator from physical stress during lifting of the work table.
- Supplied with double speed pump, with 200mm long stroke hydraulic cylinder.
- Pump can be operated by hand, or by use of the foot pump lever.
- The pistons are made of chromium plated steel.
- Moveable ram
- Other tonnage available on request

Hydraulic Electrical Press

Electrical Press with Remote Control

- New series of electrical presses with double acting cylinder.
- All presses are supplied with 2 "V" Arbor Plates and a punch plate.
- A moveable ram and winch to lift the work table is included with the presses.
- Remote control operation: easy and flexible operation by means of the remote control.
- Other tonnage available on request

Electrical Press

Operating by: "Two" - hands

- Safe two hands operation.
- Flashing warning light - when operating.

Hydraulic Gear Pullers

- Forged high strength puller body, with integral safety valve & red warning line.
- Heat treated forged alloy steel components with manganese phosphate coating for increased corrosion & wear resistance and extend working life. 120% rated capacity for jaws.
- Can be ordered with or without complete hydraulic set.
- On material lifetime warranty.
- Supplied with protective carrying case.
- 2 or 3 Jaw puller can be used for multiple pulling applications. (2 Jaw where space is constricted).

Pad Eye Tester

20,30 & 60 Tonne (Including hydraulic set)

- Test lifting/anchor points in upright, horizontal or inverted applications.
- Available in 20, 30 and 60 ton.
- Including pump, hose, connectors and load specific manometer.
- Packed in wooden crate for easy storage.
- Equipped with lifting handles for easy handling.
- Versatile applications and easy to use.

Model Number	Capacity Tonne	A	A1	A2	B	B1	B2	C	D	D1	E	F	G

Maintenance Kits

4, 10 Ton

- Sets are portable for ease of use on the job site
- Custom fitted, rugged blow molded storage case
- 10 ton set has wheels for easy transport
- Designed for pushing, spreading, pressing and more

Capacity	Pump Capacity (BAR)	Model Number	Plunger			Number of Attachments	Weight (kg)
			Collapsed Height (cm)	Extended Height (mm)	Effective Area (cm²)		
4 Tons 39 kN	552	50040	70.97	258	6.44	14	21
10 Tons 98 kN	700	50100	87.94	324	15.56	13	36.7

* When extension tubes and/or offset attachments are used, the capacity is reduced.

Mini Jacks

Compact

Interchangeable saddle on model J11050 and J11055 to add 10mm to the stand and stroke

J11050

- Low profile mini jack
- Compact and lightweight
- Convenient for storage

J11050

Capacity	Model Number	Minimum Height (mm)	Maximum Height (mm)	Hydraulic Lifting (mm)	Base Size (L x W) (mm)	Weight (kg)
5 Tonne 49 kN	J11050	60	80	20	124 x 116	2.1
5 Tonne 49 kN	J11055	85	123	38	124 x 116	2.4
10 Tonne 99 kN	J11100	122	163	41	125 x 112	5.7
20 Tonne 199 kN	J11200	130	171	41	137 x 122	7.6

Toe Jacks

Low height

- Heat treated and chrome plated medium-carbon steel cylinder.
- Chrome plated plunger improves longer seal life and optimum performance.
- U.S. Patented by-pass device protects hydraulic system from over travel damage.
- Hydraulic system is protected from internal damage by a patented by-pass mechanism (U.S. Patent No.5946912).

Capacity	Model Number	Toe Saddle		Head Saddle		Hydraulic Lifting (mm)	Base Size (L x W) (mm)	Weight (kg)
		Min. Height (mm)	Max. Height (mm)	Min. Height (mm)	Max. Height (mm)			
3 Tonne	J13060	16	146	230	360	130	151 x 113	16.4
5 Tonne	J13120	22	152	267	397	130	190 x 118	25.6
10 Tonne	J13200	28	158	280	410	130	192 x 135	37.5
15 Tonne	J13300	28	168	332	472	130	316 x 274	53

Support Pads

Stability solutions

The support pads are outrigger pads used for mobile cranes, truck mounted cranes, aerial working platforms, concrete pumps, containers, hydraulic jacks etc.

Its purpose is to spread the weight over a larger surface offering better support while also protecting the surface.

Support Pads	Model Number	Grip	Dimension (mm)	Weight (kg)	Capacity (Tonne)
	SP 44410	1	400 x 400 x 40	6	10
	SP 55415	1	500 x 500 x 40	9	15
	SP 66420	1	600 x 600 x 40	14	20
	SP 66625	1	600 x 600 x 60	20	25
	SP 1010650*	2	1000 x 1000 x 60	58	50

Other sizes/capacities available on request.

* Not standard stock item.

Support Pads

Stability solutions

- Ecological
- Light weight
- Easy to handle
- High durability
- High flexibility
- Water-repellent
- Nearly unbreakable
- No rusting
- No rotting

80% **Safety Practices**

Good industry practice recommends not exceeding 80% of maximum rated capacities of all our products.

Cylinder Selection

Question:	Tips/help	Data	Model Number
Total force required (tonne):	Total load	<input type="text"/>	
Number of cylinders required:	Number of lifting points	<input type="text"/>	
Force per cylinder (tonne):	Should be 80% of total cylinder capacity	<input type="text"/>	
Stroke required:	Plunger travel	<input type="text"/>	
Single or double-acting (D/A):	D/A used when pull force is required, or retract speed is critical!	<input type="text"/>	
Type of plunger required:	Hollow or solid	<input type="text"/>	
Collapsed height required:		<input type="text"/>	
Optional saddle required:	Tilt, Grooved, Flat	<input type="text"/>	
Cylinder base:	Improves stability	<input type="text"/>	
Selected cylinder model:		<input type="text"/>	

Pump Selection

The three most commonly selected pumps are hand pumps, electric pumps and air-driven pumps. Gas powered pumps, however can be selected in the same way.

Available power source: Manual Battery Electric Compressed Air Petrol

Hand Pump Single- or double-acting operation	Not for high cycle applications Use 4-way valve for D/A applications Check speed chart on page 92 for number of stroke per cm	<input type="text"/>	
Selected Hand Pump:		<input type="text"/>	
Electric or Compressed Air Pump Need for portability:		<input type="text"/>	
Required useable oil capacity:	1,2 x oil capacity high cycle = 2 x oil capacity	<input type="text"/>	
Available Voltage:		<input type="text"/>	
Lifting speed (Important/not important):	Use speed chart on page 92	<input type="text"/>	
Type of control:	Manual / remote pendant	<input type="text"/>	
Type of actuation/function:	Advance / Hold/ Retract	<input type="text"/>	
Selected Pump:		<input type="text"/>	

System Components

Number of hoses and length required:	<input type="text"/>	
Selected Hoses:	<input type="text"/>	
Manifold or Tee-fitting:	<input type="text"/>	
Extra hose per manifold (2):	<input type="text"/>	
Gauge (kN or bar scale):	<input type="text"/>	
Gauge Adapter:	<input type="text"/>	
Fittings:	<input type="text"/>	
Pressure Relief Safety Valve:	<input type="text"/>	
Load-holding Valve(s):	<input type="text"/>	
Hydraulic Oil:	<input type="text"/>

Industry Safety Standards

General

Do not override the factory setting of relief valves. Always use a gauge to check system pressure.

Safety Instructions

- Read and understand all printed materials provided with and on this cylinder
- Do not exceed rated capacities
- Use only on hard level surface capable of sustaining the load
- Do not connect actuators to pumps with higher pressure ratings
- Always inspect hoses and connections for damage prior to use
- Keep hands and feet clear of work area
- LIFTING DEVICE ONLY! Immediately after lifting, support the load with appropriate means
- Use only manufacturer approved hydraulic fluid
- A flow-restricting component shall not be present between the relief valve and the tank
- No alterations shall be made to this cylinder
- Failure to meet these markings may result in injury and/or property damage
- Each double-acting cylinder shall be fitted with a relief valve on the retract circuit, which bleeds off the smaller effective area of the cylinder

Cylinders

Provide a solid support for the entire cylinder base area. Use cylinder base attachment for more stability.

The entire cylinder saddle must be in contact with the load. Movement of the cylinder must be parallel with the movement of the load.

Do not use cylinder without saddle. This will cause plunger to "mushroom" Saddles distribute load evenly on the plunger.

As with jacks, never place any part of your body under the load. Load must be on cribbing before venturing under.

Always protect cylinder threads for use with attachments.

Keep hydraulic equipment away from open fire and temperatures above 150°F (65°C).

Jacks

Provide a level and solid support for the entire jack base area.

Never place any part of your body under the load. Ensure the load is solidly supported before venturing under.

The entire jack saddle must be in contact with load. Movement of the load must be in the same direction as jack plunger.

Remove the jack handle when not in use.

80% Rule

Good industry practice recommends not exceeding 80% of maximum rated capacities.

- Use only on hard, level surfaces capable of sustaining the load.
- Immediately after lifting, support the load with appropriate means
- Failure to meet these warnings may result in personal injury as well as property damage.

Hydraulic Pump Safety Instructions

- READ AND UNDERSTAND ALL WARNINGS, INSTRUCTIONS AND OWNER'S MANUAL INFORMATION BEFORE ATTEMPTING TO USE THIS EQUIPMENT
- Burst hazard exists if hose or connection pressure exceeds rated pressure.
- Do not exceed the rated capacity of this device. Monitor pressure and load at all times.
- Verify load with calibrated load cell and indicator, accurate pressure gauge or equivalent devices.
- Inspect hoses and connections for damage prior to use. Never attempt to grasp a leaking pressurized hose.
- Release the hydraulic pressure before disconnecting hoses or couplers, and before servicing the pump or accessory.
- Immediately after lifting, support the load with appropriate means. Never rely on hydraulic pressure to support a load.
- Wear protective clothing and eye protection that meets ANSI Z87.1 and OSHA standards when operating this equipment.
- Ensure that the chosen application is stable to work on and around.
- Do not subject the pump and its components to shock loads.
- Do not connect to applications which can return more oil to the reservoir than the pump reservoir can hold.
- Ensure that the rated pressure of all applications and fittings is equal to or greater than the rated pressure of this pump.
- Keep hydraulic equipment away from flames and heat.
- No alterations shall be made to this device.
- Failure to meet these warnings may result in personal injury as well as property damage.

Pumps

Do not use handle extender. Hand pumps should be easy to operate when used correctly.

Close release valve finger tight. Using force will damage the valve.

Fill pump only to recommended level. Fill only when connected cylinder is fully retracted.

Use only genuine BVA hydraulic oil. The wrong fluid can destroy your seals and pump and will render your warranty null and void.

Electric Pump Safety Instructions

TO AVOID ELECTROCUTION HAZARD:

- Owner/Operator must read, understand and follow all printed material provided with this device before use.
- Connect ONLY to properly grounded electrical source. Connect to GFI outlet ONLY! For use in dry locations.
- Avoid the use of extension cords. If used, extension cord lengths up to 7 meter shall be SJT-14X3 or heavier. For cords up to 15 meter, use SJT-12X3 or heavier.
- For extension cord lengths up to 30 meter, use SJT-10X3 or heavier. NEVER use a 3 prong adapter.
- Do not operate this device in an explosive atmosphere or in the presence of conductive liquids.

Hoses and Couplers

Clean both coupler parts before connecting. Use dust caps when coupler parts are not connected.

Detach cylinder only when fully retracted or use shut-off valves or safety valves to lock-in cylinder pressure.

Don't lift hydraulic equipment by the hoses.

Keep hoses away from the area beneath loads.

Do not kink hoses. Bending radius should be at least 4 1/2". Do not drive over or drop heavy objects on the hoses.

BVA in action

About BVA

Shinn Fu Corporation was originally founded as Shinn Fu Auto Supply Company Ltd. by Mr. Michael Hung in 1971 based in Taipei, Taiwan. Shinn Fu has grown into the global leader of hydraulic lifting equipment in the automotive aftermarket. The insistence of producing and offering only the highest quality products has earned Shinn Fu a reputation for exceptional quality in the market.

Started in 1972, Shinn Fu Corporation started manufacturing hydraulic products for the professional and consumer markets. In 2004 the company began manufacturing for the industrial market with BVA Hydraulics. In 2009, due to substantial growth in the industrial market, the company expanded its facilities in Kansas City, MO to better service the North American market.

Shinn Fu Europe B.V. (SFE) was established in 1994 in The Netherlands. With the objective of promoting and distributing Shinn Fu's products in the markets of Europe, Middle East and Northern Africa, SFE launched the Omega Lifting Equipment program in 1994. Since then, Omega has won the market's recognition.

Shinn-Chia Machinery & Foundry (Kunshan) Co., Ltd., a state-of-the-art Foundry, was established in June 1996, began with the casting production in July 1997, and added with the CNC machining processing operations in December 2000. Shinn-Chia is privately owned by the Shinn Fu Group (Taiwan) at www.shinnfu.com.

In order to provide the customers with excellent after-sales service, Shinn Fu has established worldwide branch offices in the USA, Canada, Australia, Hong Kong, Japan and Europe. SFE maintains the following brands: BVA Hydraulics™, Omega Lift Equipment®, Omega Mechanix and Pro-Lift® (<http://www.sftglobal.com/>).

Maintaining Your Equipment

Ensure a longer life span of your equipment

Hydraulic Fluids

- Use only BVA Hydraulic Oil P/N's; HV465 for pumps and cylinders.

Air Line Lubricants

- Use Class 1 Turbine Oil (ISO VG32) for Air Line Lubricant

Hydraulic and Pneumatic Filtration

- Hydraulic fluid must be kept clean, cool and free of water.
- Use Hydraulic Filtration to provide fluid which meets ISO 17/15/12 cleanliness levels.
- Air Line Filtration for solid particulate contamination removal: Use BVA P/N; FRL-145, 5uM Pneumatic Filter.
- Air Line Water Removal; Use BVA P/N; AD-145, Ambient Dryer.

Proper Operation of Equipment

- Refer to individual Product Owner's Manuals and BVA Catalogs for general information, specifications, safety, set up, operation, maintenance, trouble shooting, storage and warnings for all BVA products.

Formulas

Key to Measurements			
Weight:		Length	
1 pound (lb.)	=0.4536 kg	1 in	=25.4 mm
1 kg	=2.205 lbs	1 mm	=0.039 in
1 Tonne (short ton, US)	=2,000 lbs	1 in ²	=6.452 cm ²
1 Tonne (metric)	=2,205 lbs	1 cm ²	=0.155 in ²
Volume:		Pressure:	
1 in ³	=16.387 cm ³	1 psi (lb/in ²)	=0.69 bar
1 cm ³	=0.061 in ³	1 bar	=14.5 psi
1 liter	=61.02 in ³	1 kPa	=0.145 psi
	=0.264 gal(US)		
1 gal (US, liquid)	=3.785 liter	Temperature:	
	=231 in ³	0°F	=(0°C x 1.8) + 32
	=3,785 cm ³	0°C	=(0°F - 32) ÷ 1.8

Cylinder Plunger Speed

$$\text{Formula} \rightarrow V = \frac{A}{Q} \times 60$$

$$\text{Cylinder Plunger Speed (sec/cm}^2\text{)} = \frac{\text{Cylinder Effective Area (cm}^2\text{)}}{\text{Pump Flow Rate (cm}^3\text{/min)}} \times \frac{60 \text{ (sec)}}{1 \text{ (min)}}$$

Force

$$\text{Formula} \rightarrow F = P \times A$$

$$\text{Force (kg)} = \text{Hydraulic Working Pressure (kg/cm}^2\text{)} \times \text{Cylinder Effective Area (cm}^2\text{)}$$

Cylinder Oil Capacity

$$\text{Formula} \rightarrow C = A \times L$$

$$\text{Oil Capacity (cm}^3\text{)} = \text{Cylinder Effective Area (cm}^2\text{)} \times \text{Cylinder Stroke (cm)}$$

1/4" Hose Oil Capacity

$$\text{Formula} \rightarrow C = \frac{\text{Internal Diameter (mm}^2\text{)}}{4} \times \pi \times \text{Length of Hose (m)}$$

$$\text{Oil Capacity (cm}^3\text{)} = 33 \times \text{Length of Hose (m)}$$

3/8" Hose Oil Capacity

$$\text{Formula} \rightarrow C = \frac{\text{Internal Diameter (mm}^2\text{)}}{4} \times \pi \times \text{Length of Hose (m)}$$

$$\text{Oil Capacity (cm}^3\text{)} = 72 \times \text{Length of Hose (m)}$$

Cylinder Effective Area

$$\text{Formula} \rightarrow A = \pi \times \frac{D^2}{4}$$

$$\text{Cylinder Effective Area} = \pi \times \frac{\text{(Cylinder Bore Diameter)}^2}{4}$$

$$\pi = 3.14159265359$$
