

WIRE ROPE CUTTERS

Designed for new and unused wire rope

**MORSE
STARRETT**
Since 1928

IMPACT

Model 1
3/4" capacity

Model 1A
1 1/16" capacity

Model 2
1 1/2" capacity

The original portable tools invented in 1928 by Morse-Starrett to cut wire rope. Actuated by striking with a hammer, they are easy to operate and will give a superior performance without jamming. They are precision-engineered to deliver a cut without affecting the original roundness of the wire rope. The blades and dies are made of the finest tool steel available, heat-treated, and ground to close tolerances.

Model W-075
3/4" capacity

Model P-1125
1 1/8" capacity

Model C-1750
1 3/4" capacity

These self-contained hydraulic cable cutters are precision engineered tools designed to give a clean cut with minimum effort.

Just pump the handle, no outside power is required. Able to be easily carried, these models are favorites of contractors, rigging lofts and elevator repairmen, and are recommended by wire rope manufacturers worldwide. All three models will operate underwater.

POWER OPERATED

Model POC 2500
2 1/2" capacity

Model POC 1750
1 3/4" capacity

Model POC 1125
1 1/8" capacity

Maximum travel return line has been added to POC 1750.

These models can be activated by any electric, gasoline, hand, battery or air operated hydraulic pump capable of developing 10,000 p.s.i. and having free flow return through the pressure line. The pumps are then hose-connected to the Hydrashear body. Available in three sizes and cutting capacities.

Model must be specified when ordering parts

Designed to operate at a maximum pressure of 10,000 psi, the DA POC 3500 has a double-acting 75-ton cylinder that **will cut 3 1/2" cable in 40 to 45 seconds.**

Model DA POC 2500

Designed to operate at a maximum pressure of 10,000 psi, the DA POC 2500 has a double-acting 50-ton cylinder that **will cut 2 1/2" cable in 30 to 35 seconds.**

A double-acting cylinder is powered in both directions for a faster and more positive return.

Both cutters are powered by an electrically driven hydraulic pump 3 HP/3 phase dual voltage motor, 240/460 - 60 Hz.

The DA POC 2500 and DA POC 3500 are sold as a complete unit, including cutting head, base plate, cylinder, pump and hoses.

MODEL S

Designed for cutting:

- $\frac{1}{2}$ " prestressed concrete strand
- $\frac{1}{2}$ " mild steel round chain
- $\frac{5}{8}$ " reinforced bar
- $\frac{5}{8}$ " bolts

Model S

Convenient to use at any angle and weighing less than 12 lbs, the Model S can be activated by any electric, gasoline, hand, battery or air operated hydraulic pump capable of developing 10,000 p.s.i. and having free flow return through the pressure line. The front blade can be adjusted to proper cutting clearance after sharpening, and the back blade is fixed.

Please specify if tool will be used for cutting round chain; a modification of the cutting head is required.

CABLE BANDS & PUMPS

Morse-Starrett stocks a variety of pumps and parts (including hoses and fittings) which are compatible with our power operated tools. Please inquire about price, availability and specifications.

Cable band sizes:

3/16"	9/16"	15/16"
1/4"	5/8"	1"
5/16"	11/16"	1 1/8"
3/8"	3/4"	1 1/4"
7/16"	13/16"	1 3/8"
1/2"	7/8"	1 1/2"

Designed for use with the Morse-Starrett cutter, bands are made of pliable material indented with a groove and lock seam at one edge. Application of the band is simple, requires no special tools and may be made in seconds with an ordinary pair of pliers.

Note: Each rope requires a band of corresponding size. All bands packed and sold in boxes of 50, one size per box.
